Fundamentals of Natural Language Project

2025-26

Organization of the project

You will work in **groups of 3/4 students**. You can **register** your group in **Campus Virtual**.

Calendar of the project:

- *March 18th*: Introduction of the project
- *April 8th*: First follow-up of the project
  - Analysis and understanding of the task, dataset and annotation
  - Literature review
  - Proposal of the methods to be implemented
- *May 11th*: Second follow-up of the project
  - Implementation and evaluation of a first method
- *June 1st – June 3rd* : Final presentation of the project
  - Final implementation of the proposed solution
  - Written report with the description of your proposed solution, experiments and critical analysis of results and conclusions
  - Oral presentation (10 minutes per group) with the main results and conclusions of the project

Organization of the project

Next steps

- Get familiar with the task, the dataset and the annotation format
  - Analyze the data and the annotations
  - Understand the main challenges of the task
- Get familiar with the reference methods
  - Read the survey paper you can find in Campus Virtual
  - Think of possible methods explained in the paper (non-deep learning-based) that you could use for the project
  - Read and analyze the papers describing those methods
- Prepare a short presentation (2-3 minutes) for the first follow-up
  - Describe your own proposal of solution for the task based on your analysis of the problem and the literature review

Evaluation of the project

Project Grade = 0.6 * Grade Deliverable + 0.2 * Grade Presentation + 0.2 * Grade Individual evaluation

- The **deliverable grade** is obtained from your final report, the code submission and answers to questions we make during the evaluation.
- The **presentation grade** is obtained from your final presentation.
- The **individual evaluation** comes from the contribution of each member to the group through intra-group evaluation and participation in follow-up sessions and final presentation.
- **Conditions**:
  - Final project grade >= 5
  - If project grade >= 5 but a student did not participate in the activities of the project a final grade of 4.5 will be given.
  - Recovery of the project if final deliverable is presented, but the final project grade does not reach the minimum of 5.
    - Maximum project grade in case of recovery is 7.
